PRODUCT FEATURES

A TCM2 control and monitoring unit offers the following features:

Reduces Man-hours: With the simplified, 4-button user interface, operators can quickly program the TCM2. The new TCM2 wiring harness allows maintenance personnel to swiftly install, remove, and conduct troubleshooting of the system.

Improved Control Methods: The TCM2 utilizes multiple control methods, similar to the Thermon TCM18 (On/Off, Soft-Start, Proportional) and features the upgraded Ambient Proportional Control (APC and APCM) that employs the energy saving method of Ambient Proportional Control with the higher current capacity of the mechanical relay.

<u>Upgraded Communications:</u> The TCM2 can network with any Thermon Controller to the Genesis Network or any plant DCS system via RS-485 in either MODBUS ASCII or RTU. In the panel, the TCM2 can employ a converter to offer MODBUS TCP/IP Ethernet.

- 1. For load voltages above 600 Vac, contact factory.
- 2. For higher amperage ratings, contact factory.
- 3. Ethernet or wireless communication via optional accessory modules.
- 4. When used within Thermon TraceNet TCM2 control panels.
